

LEED - Qualification

Low-emitting materials - adhesives and sealants

EQc4.1 | Possible 1 Point

Intent

To reduce the quantity of indoor air contaminants that are odorous, irritating and/or harmful to the comfort and well-being of installers and occupants.

Spectis Moulders offers a low VOC construction adhesive to help projects achieve this low-emitting materials criteria. Spectis Adhesive can be used for the installation of all our products.

Low-emitting materials - paints and coatings

EQc4.2 | Possible 1 Point

Intent

To reduce the quantity of indoor air contaminants that are odorous, irritating and/or harmful to the comfort and well-being of installers and occupants.

Spectis Moulders products accept most low VOC paints and come factory primed, to minimize onsite fumes and/or pollutions. Choosing the right paints and coatings to finish our products may assist you in obtaining this point.

Construction waste management

MRc2 | Possible 1-2 Point

Intent

To divert construction and demolition debris from disposal in landfills and incineration facilities. Redirect recyclable recovered resources back to the manufacturing process and reusable materials to appropriate sites.

Spectis Moulders uses recyclable cardboard and/or OSB crates to transport all our products to the jobsite. These materials can be recycled or reused to reduce landfill waste. Spectis products also come factory primed to reduce on-site paint waste.

REGIONAL MATERIALS

MRc5 | Possible 1-2 Point

Intent

To increase demand for building materials and products extracted, processed, and manufactured within the region, thereby supporting the use of indigenous resources and reducing the environmental impacts resulting from transportation.

If your project is within 500 miles of Spectis Moulders' manufacturing facility, located in Niverville, MB Canada, you may be eligible to claim the Regional Materials Credit.
