

## Domes

Spectis Moulders is experienced in creating domes in either polyurethane or GFRG. Both of these materials create a smooth finish for your paint crew to either faux finish or to paint in a solid colour of your choice.

For ease of installation, larger domes have mounting hooks fabricated onto the back side of the dome as seen in these photos.

We have tackled very unique custom dome requests and would love to quote yours as well. Call your customer service representative to get a custom quote started for you.
